

The chemical composition of Rolled stainless steels(RSTS 316L)

■ Summary of main amendments

Related Rules/Guidance	Effective Date
Part 2 of the Rules	1 July 2020 (The date of application for certification of materials and welding or the contract date for ship construction)

■ Main amendments

○ Reason

It was investigated that the minimum chemical composition of Ni in the Rolled stainless steel (RSTS 316L) was excessive.

○ Amended Items

The minimum requirement of Ni was revised from 12.00% to 10.00%. Stainless steel pipes (RSTS 316LTP) has also been revised.

○ Impact analysis

✓ Indication of any impact on and/or contribution to safety, security or environmental protection

: N/A

✓ Indication of any impact on net and gross scantlings

: N/A
