Subject : Notice for release of web-based 'SIP(Ship Implementation Plan)' development service and distribution of technical information

The 73rd MEPC(Marine Environment Protection Committee) approved the guidance on the development of a SIP for the consistent implementation of the 0.5% global fuel sulphur limit under MARPOL Annex VI that take effect from 1 January 2020. Although the IMO(International Maritime Organization) did not decided the SIP as a mandatory requirement, administrations and port state control authorities may check the SIP to confirm the compliance with the 0.5% global fuel sulphur limit.

Therefore, KR provides free web-based SIP development service and distribute the technical information for ship owners and management companies to easily prepare the SIP.

1. Launching web-based 'SIP' development service

- 1) Ship owners and management companies can access the web-based 'SIP' management system(URL: http://gears.krs.co.kr/www/index_sip.html) and develop the SIP in compliance with the IMO guideline. Also, the SIP can be printed out in electronic file format when the required contents are inputted and evidence files are uploaded on the system.

2. Distribution of technical information for the development of SIP

- 1) For customer's convenience, KR developed the 'Guidance for development of the SIP'. This guidance not only specifies the development method of the SIP but also the technical details that ship owners need to consider to use the low sulphur fuel oil for the compliance with the 0.5% global fuel sulphur limit.
- 2) The template and sample of the SIP are attached to this document for your reference.

Attachment: Guidance for the development of the SIP - 1 copy.

The template and sample of the SIP - 1 copy for each item.

KR GEARs Brochure - 1 copy. (end).

Chairman & CEO of Korean Register

Distributions : KR surveyors, Ship owners, Ship builders, Other relevant parties
